

DMG / SALESFORCE TURNKEY VACCINE SOLUTION

Rapid, safe and efficient COVID-19 vaccine distribution centers

COVID-19 virus has infected almost 40M people and has claimed over 1M lives. Over 165 vaccines are in development around the world, with more than two dozen in human trials. To help facilitate the safe distribution and administration of coronavirus vaccines to billions of people, DMG and Salesforce have developed a turnkey solution providing modular clinical facilities, staffing and technology to assist your organization in the safe and efficient distribution of approved coronavirus vaccines.

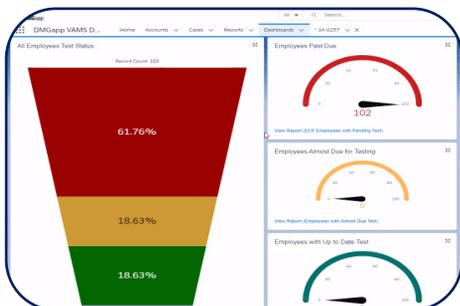

DELIVERING FACILITIES, STAFFING AND TECHNOLOGY FOR VACCINE MANAGEMENT

Rapid deployment of modular vaccine facilities include Administration, Examination, Phlebotomy and Vaccination pods

Optional staffing capability with **Aspen Medical** including physicians, nurses, phlebotomists, lab technicians and administration.

DMG, with the help of **Salesforce**, created a vaccine management platform designed with flexibility in mind. Our unified platform can deliver integrated capabilities no matter where your organization is in the vaccine distribution lifecycle.

TURNKEY MODULAR VACCINE FACILITIES

Customizable Configurations From Design to Deployment in 14-days*

ADMINISTRATION

Administrative staff and waiting area for processing guests including a 50" TV. Includes staff rec room.

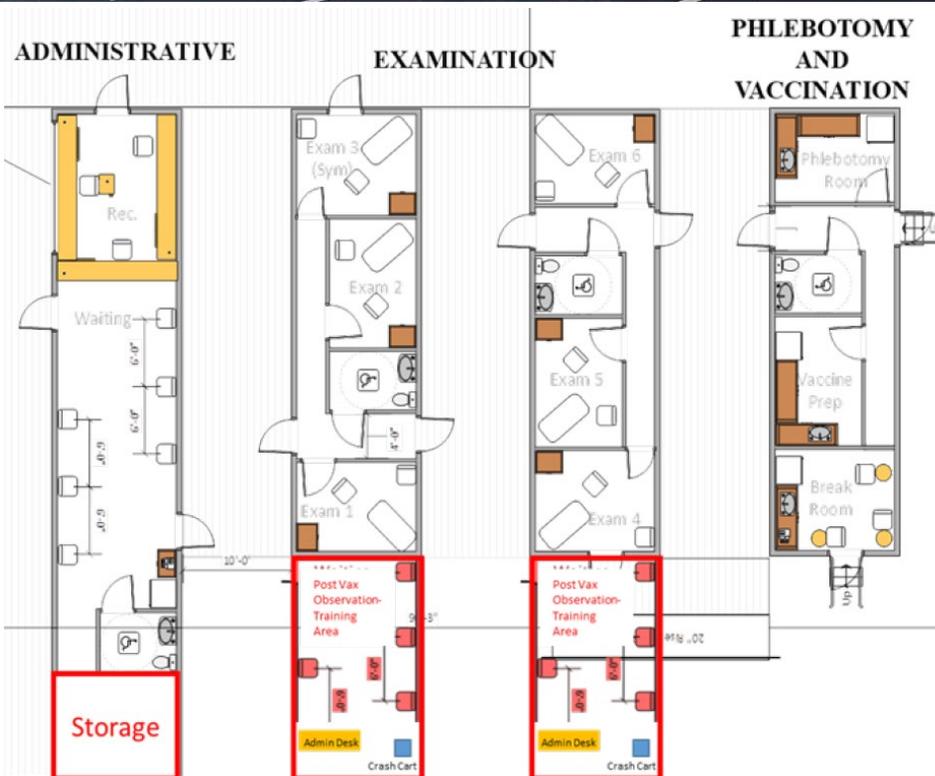

EXAMINATION

Configurable exam rooms for vaccination delivery with post-vaccination observation and training area.

PHLEBOTOMY AND VACCINATION

Phlebotomy room with patient chairs, post-vaccination prep area with compressor-less ultra-low temperature medical freezer, medical grade bathroom and break room.

FACILITIES INCLUDE DECKING, WALKWAYS AND ADA RAMP

* Pending local permitting

COMPLETE VACCINE PROGRAM MANAGEMENT

One platform to mobilize, manage, and scale vaccine administration

VACCINE ADMINISTRATION

Ensure medical professionals are trained on vaccine administration including pre-arrival screenings and appointment approvals.

CALL CENTER MANAGEMENT

Manage large call volumes and dialup check-ins by deploying virtual agents to address frequently asked questions and leveraging automated voice, SMS/text, email and social apps like Facebook Messenger and WhatsApp

HEALTH COMMAND CENTER

A holistic dashboard view into the health status of communities displaying current vaccine and medical product inventory levels and a forecast of potential vaccine needs.

PROXIMITY DETECTION

Ensure that patients are keeping a safe distance using various automated proximity detection solutions. DMGapp supports both video surveillance using smart technology and wearable devices like wristbands and lanyards to monitor social distancing.

INVENTORY MANAGEMENT

Keeps track of the availability of any item critical to the efficient distribution of vaccines, including doses, syringes, blood sample vials and PPE stock levels.

APPOINTMENT SCHEDULING

Schedule vaccination appointments and perform health screenings with electronic consent capture while allowing clinicians to determine and prioritize eligibility. Includes contactless mobile phone check-in and QRC code scanning to promote health safety.

DMGapp IS BUILT ON SALESFORCE HEALTH CLOUD TO ENSURE HIPPA, GDPR & HL/7 COMPLIANCE
